Subject: Wells Project ILP begins...

Terrestrial RWG,

On December 1, Douglas PUD filed their Notice of Intent (NOI) and Pre-Application Document (PAD) to begin the formal relicensing process for the Wells Hydroelectric Project. We want to bring to your attention several points that may be of importance as well as to begin setting several future dates for future RWG meetings.

1. Now that the Wells Project Relicensing has officially begun, please be aware that all substantive correspondence related to the Wells relicensing will be documented into a consultation record. These communications will be posted onto the Wells Project Relicensing website;
2. Information regarding meetings, documents, workgroups, and communication related to the Wells relicensing from now on will be available via the Wells Project Relicensing Website which can be accessed either directly <http://relicensing.douglaspud.org/> or through the Douglas PUD homepage <http://www.dcpud.org/>;
3. Given the success of the RWGs thus far, we feel that it would be beneficial for everyone to continue working within this forum during the formal process. Currently, we have two future meetings dates in mind for the next round of RWG Meetings. We are proposing to have the first meeting on February 6, which is approximately one week after FERC issues Scoping Document 1 (SD1). The agenda for this meeting will consist of discussing SD1 as well as the upcoming process including the scope and timing of management plans. The second meeting would be on April 19, which is shortly after study requests have been filed. Please let me know as soon as possible whether these dates will work for you.

You can find the Wells relicensing timeline at:

http://relicensing.douglaspud.org/relicensing_process/images/FullILP%20Timeline.pdf

Happy holidays!
