Michael,

Below is a message I sent to Susan Rosebrough regarding comments that she and Jim Eychaner had on our Recreation Needs Analysis study plan for Wells Relicensing. I realize that Susan is on maternity leave, so I wanted to send this on to you for your information.

I've also attached a message from Jim Eychaner with his concurrence on the changes.

If you have any questions, please feel free to contact me at any time. I hope Susan is doing well.

Thanks!

Subject: Wells Reservoir Rec Needs Analysis

Susan, Lee, and Jim,

Please find attached the revised Rec Needs Analysis for the Wells Project. I hope these edits address your concerns regarding Hispanic use of the reservoir. Please feel free to provide any feedback you may have. This was your issue, so I want to be sure that you are comfortable with the changes before sending out to the rest of the work group. All of the changes are highlighted in yellow.

You will also see that we added some additional detail to the methods section on

estimating future recreation use. This was in response to a suggestion by FERC that we be sure that everyone in the RWG has an understanding of the protocol we plan to use. Jim and Susan - you are the experts on this, so your feedback on this added methodology would be helpful.

Thanks much for your input.

-Scott
